

Matthew Bibby

I could be described as a multitude of things, ranging from sociable, antisocial, interesting, exciting, boring. Luckily the positives tend to outweigh the negatives so I am told. (PHEW). THE ONE THING that is certainly not in dispute is Passion. I look for all things in life that give me a buzz and give me a shiver down my spine. I was lucky enough to volunteer at the Olympics and have just been invited to an interview to volunteer in London next year for the World Championships. You may guess I love big social events and sports. I am a part season ticket holder at Liverpool FC and make the frequent journey in rush hour to my beloved Anfield.

Born in Harrogate, I grew up mainly in Otley and Eldwick, attending Bradford Grammar School for the majority of later schooling life before going to university in Wales to study Environmental Science and then a PGCE.

Although I enjoy singing and am a tenor I have no time for something that I really enjoy although I have considered really joining Queensbury Singers at some point if free time materialises.

I am lucky enough to have found a job that makes me tick in the council as communications and IT officer having spent the first half dozen years after university searching for my ideal career. I did work as a primary school teacher in my younger years but I must add I am not saying I am now old, despite the silver hair which started to materialise in my 20's!!!

I continually wish to achieve the most I can from life. Education remains an enormous interest in my life and whilst I still toy with an idea of returning to a teaching environment I also hope that where ever I end up and progress to I want to have a positive impact in people's lives.
