

What's so the great about the USA?
Spring term 2
Year 5

As mathematicians we will master fractions, decimals and percentages. We will try to improve our speed and fluency with times tables.

As readers we will read information texts about America. Our class novel is 'Holes' by Louis Sachar.

As writers we will write information texts about North America.

As Geographers we will locate the world's countries, using maps to focus on North America, concentrating on physical and human characteristics, countries, and major cities. We will study New York from the perspective of its growth; its position on the Hudson; its importance in world economy.

As scientists, we will finish our study of changes in materials and then begin a study of the Earth and Space.

As historians we will research the history of America and find out who the original Americans were and why there are so many people from different nationalities in the USA.

As artists we will study the work of Andy Warhol; we will produce art work in his style. We will also try to recreate the work of Roy Lichtenstein Peter Thorpe Space art.
