

As writers we will be looking at adventure stories and how different authors use themes, description and action to create interesting and exciting stories. Also we will be studying biographies/ autobiographies. We will also investigate traditional stories of Central American and Mayan people.

As mathematicians we will be developing our mental and written methods for the four operations and our understanding of place value. We will also investigate the Mayan's own number system.

In Music we will be studying the traditional music of Central America. As well as continuing with our vocal coaching.

As designers we will be investigating different types of Mayan and Central American foods.

As computer programmers we will develop our ability to use Microsoft word and power point to present our research.

As Geographers, we will be studying the land of the Ancient Mayans...Central America. We will investigate Central America's diverse habitats, climates, people and cultures.

As Historians we will be exploring the Ancient Mayan civilisation, focusing upon their traditions, customs and beliefs. Also, we will investigate why the Mayan civilisation ended and what impact they had upon our modern lives.

In PSHCE we will discuss Mental health and emotional wellbeing, with a focus on Healthy minds

In Physical Education we will focus upon football and team building activities as well as studying and playing Ancient Mayan sports.

As Scientists we will be investigating evolution and answering the question- have we always looked like this? We will also be focusing on the rich bio-diversity of the living things in Central America

In RE we will be investigating why some religions spread and why some die out. We will be continuing to learn French.

As artists we will be investigating Mayan masks and artefacts and designing and making our own using clay.
