

In writing lessons we will be developing our skills for writing narratives and instructions. We will also focus on handwriting and spelling patterns.

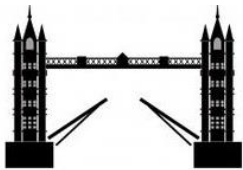

As designers we will be studying different types of bridges before designing, building and evaluating our own bridges.

In maths lessons we be learning how to interpret and represent data using bar chars, pictograms and line graphs. We will also look at different types of angles and triangles.

As language speakers we will continue to develop our knowledge and understanding of French vocabulary.

LONDON

In Religious Education we will continue to develop our understanding of different beliefs.

In our topic lessons we will be investigating the question, 'Why is the River Thames so important to London?'

As scientists we will be investigating living things and their habitats and learning about the seven life processes.

In Physical Education we will be developing a range of athletics and team games.
